Welcome to Our Total Healing Environment

Selecting a doctor to care for you and your family is one of the most important decisions you will make. From preventive medicine to the common cold to more serious conditions like heart disease and neurological disorders, you want the right care, when you need it, close to home. That's why we want to introduce you to the healthcare teams at YRMC PhysicianCare.

Designed to support a collaborative approach to healthcare, our integrated network of multispecialty medical practices include board-certified physicians, advanced clinical practitioners, highly trained nurses and friendly, professional staff who believe that it's a privilege to care for you.

Our Vision of a Total Healing Environment means that we create a close partnership with our patients which leads to peace-of-mind and peace-of-heart, as well as physical cure and comfort, because we understand the unique relationship that exists between the body, mind and spirit.

Where Patient Care and Technology Thrive

We take great care to provide our patients with highly personalized healthcare enhanced by the latest medical technology.

Take for example our **remote monitoring program** for patients managing chronic medical conditions. Through the use of a mobile device and wireless technology, a caregiver in our clinic can monitor the health status of a patient at a remote location. This is a prime example of how technology in the hands of a skilled caregiver can benefit our patients.

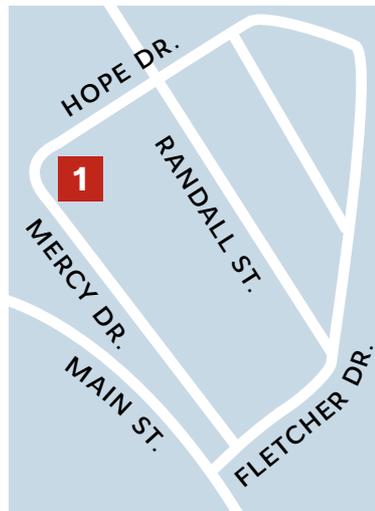

Another example is our commitment to **digital medical records** that connect our caregivers to each other and to other specialists across the YRMC network. Sharing information across our team enhances the care you receive and gives you access to much of the same information through our patient portal, YRMC CareConnect.

A Network of Care for You

Our healthcare providers are specialists in the type of care you need. From family medicine to pain management, our collaborative network includes:

- Breast Surgery
- Cardiology
- Cardiology, Electrophysiology
- Cardiology, Interventional
- Cardiology, Structural Heart
