OPENING MAY, 2010

Women who are due to deliver their babies after May 2010 will be among the first to experience all that YRMC's new Women's Health Pavilion & Family Birthing Center has to offer.

The new facility, located on YRMC's beautiful East Campus in Prescott Valley, covers approximately 45,000 square feet—more than tripling the size of the 20-year-old landlocked Family Birthing Center on the West Campus. Our new Family Birthing Center will offer everything from private patient rooms to prenatal education and family support.

Each patient will have her own private labor, delivery, recovery and postpartum (LDRP) room with a large private bathroom. Patient beds will be placed to ensure maximum privacy and won't be visible from the hallway. We will also include a well-proportioned and comfortable sleeper/sofa for dad or coach, as well as special areas where family and friends can relax and visit. Add to that such state-of-the-art amenities as a wireless internet connection for emailing baby pictures to friends and family, a TV/DVD unit, a small refrigerator in each patient room and even room service!

Patient rooms are set up for "couplet care" so baby can stay in the same room with mom, day and night. A dad in one of our community focus groups remarked, "It was really magical to spend the first few days in the same room where my baby was born."

We are proud of other brand new features—two dedicated, state-of-the-art cesarean-section operating rooms, six private triage rooms and two nursery areas.

YRMC's new family-centered obstetrics program, birthing rooms and nursery will make childbirth an experience you and your family will cherish forever
