

## Impact - YRMC Programs Supported 2019

Your donation will have a visible and positive impact at YRMC and throughout our community. Here are a few examples of projects and programs recently funded thanks to your support of the YRMC Foundation

### *Community Care Endowment Fund*

Honoring our donor's wish "to provide continued support for the health and well-being of our communities' most vulnerable", we established the Community Care Endowment Fund in partnership with the Arizona Community Foundation of Yavapai County.

### *BreastCare Center*

Your charitable support enabled the BreastCare Center to continue to provide screening mammograms at no cost to those less fortunate. Funds also helped support YRMC's breast health awareness/community education programs.

### *Clothing Closet*

Your donations to YRMC's Clothing Closet provided clothing to our patients in need. These are often accident victims in our Emergency Department whose clothing was removed for treatment or patients who are less fortunate and in need of warm, clean clothing upon discharge.

### *Community Outreach and Education*

YRMC's champion of health, Wellby the Yavabear, is fitter than ever thanks to a good diet, routine exercise and a new wardrobe purchased with your support. As community spokesbear, Wellby encourages everyone to make wise and informed choices.

### *Employee Emergency Fund*

YRMC employees who have experienced a sudden, catastrophic and life-altering event are eligible to receive financial assistance through the YRMC Foundation. During the past year, the Foundation was able to assist more than 40 individuals.

### *Family Birthing Center*

To increase the percentage of mothers who breastfeed their babies, the YRMC Foundation provided funding that enabled three FBC staff members to obtain certification as Lactation Consultants by the International Board of Lactation Consultant Examiners.

### *Family Resource Center*

YRMC Foundation funds helped to support our Family Resource Center's group activities for participating families. These events provide important socialization opportunities for parents and children alike.

### *The James Family Heart Center*

Originally established with community donations, The James Family Heart Center offers one of the most comprehensive cardiac programs in Arizona thanks to your support. This year, donated funds helped equip our new cath lab with the latest technology.

### *Palliative Medicine*

YRMC Foundation funding sponsored a two-day organizational leadership training and organizational planning workshop for YRMC's Palliative Medicine team conducted by Mr. Chris Greathouse of Life Surge Coaching.

### *Partners for Healthy Students*

Thanks to your concern and generosity, YRMC was able to add behavioral health counseling to our Partners for Healthy Students comprehensive program of primary care service offerings to schoolchildren whose families have little or no health insurance.

### *Pendleton Center*

The YRMC Foundation provided funds to help purchase a new telemetry system for our Cardiac Rehabilitation program. This state-of-the-art system enables our staff to monitor the health, safety and progress of their patients.

### *Volunteer Services*

Providing patients and guests convenient transport from our parking lots to our front door is a signature service provided by YRMC volunteers. To ensure safe and reliable service, Foundation funds enabled the purchase of two new courtesy carts.

Thank you. These projects and programs are made possible through your thoughtful support.
