A Dignity Health Member

Impact - YRMC Programs Supported 2020

Your donation will have a visible and positive impact at Dignity Health, Yavapai Regional Medical Center (YRMC) and throughout our community. Here are a few examples of projects and programs recently funded thanks to your support of the YRMC Foundation.

Breast Care Center Fund

Your charitable support enabled the Breast Care Center to continue to provide screening mammograms at no cost to those less fortunate and to support YRMC's breast health awareness/community education programs. Funds were also used to provide essential health supports to patients who do not qualify for other programs and community resources. Examples include grocery vouchers, transportation vouchers for hospital appointments, wigs for those experiencing hair loss, and home cleaning.

Capital Fund

Thanks to a major donation from YRMC's Volunteer Gift Shop, the main lobby at YRMC's Prescott campus was redesigned with the installation of new, more comfortable furnishings to allow for greater physical distancing and increased space for wheelchairs and other assistive devices.

Community Care Fund

Thanks to all those who participated in the 2020 National Doctors' Day appeal by the YRMC Foundation, renovation work began to YRMC's Emergency Department at the Prescott campus. Updates included new lighting and flooring, a refresh of patient rooms, and the reconfiguration of nurses' stations and clinical support areas.

COVID-19 Response Fund

During the peak of COVID-19, YRMC staff cared for well over 100 infected inpatients daily and operated at more than 120 percent capacity. This influx placed unexpected demand for oxygen at our facilities, nearly exceeding our system's capacity to deliver. Fortunately, the YRMC Foundation's COVID-19 Response Fund was immediately available to cover this unforeseen expense to resolve the issue.

Early in the pandemic, a timely and generous donation enabled YRMC to purchase an additional, much needed, and state-of-the-art disinfection system. The system utilizes UVC light for YRMC's Environmental Services (EVS) team to disinfect patient rooms, intensive care units and surgical suites. UVC wavelengths are capable of inactivating bacteria, viruses and protozoa, making this an effective, environmentally-friendly and chemical-free way to prevent microorganisms from replicating.

Two items in high demand at healthcare institutions were Powered Air Purification Respirators (PAPRs) and rapid decontamination systems that utilize UV light to protect against deadly pathogens. The YRMC Foundation helped fund the purchase of 20 respirators and six decontamination units.

COVID-19 Response Fund (continued)

Dignity Health YRMC opened Yavapai County's first public Vaccination Center in a vacant space at a local mall, staffed by healthcare professionals and volunteers administering up to 500 vaccines daily. Thanks to donor support, the YRMC Foundation underwrote the Center's lease fees and helped coordinate the delivery of meals and refreshments for the Center's personnel.

The James Family Heart Center Fund

The comprehensive renovation of the first cardiac catheterization lab at the James Family Heart Center was begun immediately upon the opening of the new Cath Lab 3 in 2019. A six-figure distribution from the Foundation helped underwrite the purchase of lab technology and instrumentation for the Lab.

Volunteer Services Fund

Thanks to the many patrons of YRMC's popular gift shops, proceeds from our shops made possible the purchase of a new courtesy cart to safely and efficiently transport patients and guests from YRMC parking lots to our facility entrances.

Thank you. These projects and programs are made possible through your thoughtful support.
